**SAKÂW ASKIY MANAGEMENT INC.
2019-2020 OPERATING PLAN APPROVAL
PRINCE ALBERT FOREST MANAGEMENT AGREEMENT AREA**

Pursuant to The Forest Resources Management Act

APPROVAL NO. 20/21-PAFMA-SAKAW-OP1

WHEREAS:

1. Sakâw Askiy Management Inc. is a registered company in the Province of Saskatchewan, hereinafter referred to as Sakâw.
2. Pursuant to Section 35 of The Forest Resources Management Act Sakâw was granted rights to harvest through issuance of a forest management agreement.
3. Section 38(1)(b) of The Forest Resources Management Act provides that prior to commencing any activity authorized by a forest management agreement; the licensee shall submit to the minister for approval a five-year operating plan.
4. Pursuant to the December 1, 2019 submission and March 19, 2020 follow up, Sakâw has submitted an operating plan consistent with the Forest Operating Plan Code Chapter D.1.3 and the associated Forest Operating Plan Standard.
5. Sakâw and its Shareholders agree to the terms and conditions of this plan and this approval as recognized by the following signature of a company representative.

... 2

NOW THEREFORE:

Pursuant to Section 39.1(2)(a) of **The Forest Resources Management Act**, the Minister of Ministry of Environment (MoE) hereby approves Sakâw's 2020-2025 Operating Plan on the Prince Albert Forest Management Agreement Area subject to the terms and conditions set out in this approval.

Dated at Prince Albert, Saskatchewan this **31st** day of March, 2020.

(Sakâw Representative)

(Department Representative)

General Operating Conditions

1. All Forest Management Plan (FMP) references within the 2020-2025 Operating Plan are to the approved version of the 2018 Sakâw FMP.
 2. Actual timber volumes harvested by Sakâw and/or its shareholders from the available volume approved in this plan, shall not exceed the volume for a 5 year cut control period as determined in the 2018 Sakâw Forest Management Plan (FMP). The 5 year cut control volumes are those allocations described in Schedule F of the Amended and Restated Prince Albert Forest Management Agreement (PA FMA). Changes to the allocations must be approved in accordance with Article 4.05 of PA FMA.
 3. Shareholders must operate consistently with harvest profile VOITs established in the FMP.
 4. Sakâw and/or its shareholders shall operate in accordance with the approved Forest Operations Standard effective as of May 15, 2019 unless there is an update to the Standard, then the update takes effect immediately on being signed into effect.
 5. Year 1 block design for all harvest blocks as identified in tables 1 and 2 are approved subject to conditions within those tables.
 6. Until such a time that code, standards or FMPs address the issue of retention and in-block structure being left, harvest of all blocks is to be fully integrated with forest products for all shareholders being removed in a single entry and align with the current approved FMP/VOITs. Increased hardwood retention is authorized only in conformance to the Ministerial Approval of January 13, 2020, effective April 1, 2020. In any blocks where excessive hardwood will be left, Sakâw must submit notification to the Area Forester prior to harvest.
 7. Sakâw and individually specified shareholders are responsible for all operational activities as outlined in table Sakâw_Operating_Plan_Proposed_Harvest_Tables_Year 1-2020- to Year 5-2025-Detail Final_v2 and must meet all regulatory requirements.
 8. For all activities outside of harvest blocks e.g., roads, crossings, and signage both the softwood and hardwood shareholder in the operating zone will be responsible for those activities unless otherwise identified to the Area Forester prior to harvest with evidence that all shareholders are aware of this responsibility i.e., notification must come through Sakâw and go to all shareholders. In instances where operational activities cannot be tied to a shareholder or in the instance of vacated shareholders ... 4Sakâw is ultimately responsible.
-
-

9. Sakâw and/or its shareholders shall comply with the terms and conditions of the approved Aquatic Habitat Protection Permit # 20/21-PAFMA- SAKÂW -AHPP01 issued on March 31, 2020 for all crossings constructed, maintained or reclaimed under the authority of the permit.
10. Sakâw and/or its shareholders shall comply with the terms and conditions of the approved Temporary Work Camp # 20/21-PAFMA-SAKAW-TWCP01 issued on March 31, 2020. Prior to establishment of temporary work camps Sakâw, with agreement from shareholders, must identify the shareholder responsible for each camp. Upon establishment all camp locations must be provided to the appropriate inspecting officer.
11. In accordance with Section 39(1) of The Forest Resources Management Regulations (FRMR) all forest products harvested in the 2020-2021 operating year are approved to remain in year 1 harvest areas and storage sites identified in **20/21-PAFMA-SAKÂW -MUP1** until March 31, 2021. Forest products intended to be staged or stored at locations beyond March 31, 2021 are identified as potential areas in Appendix C as described in the executive summary for this plan. Shareholders, through Sakâw, must identify and submit for approval by January 15, 2021 the actual locations from the anticipated harvest areas/storage sites, the estimated or requested volumes to be stored at those locations and the anticipated date the timber will be removed from the sites. All approvals granted under the authority of 39(1) of FRMR will be forwarded to the Forest Service Scaling Unit for approval to exceed 90 days to scale in accordance with section 48 of FRMR.
12. Sakâw Askiy Management Inc. must provide one consolidated weekly update of active shareholder harvest operations on the PA FMA or provide acceptable access to their system so that Forest Service PA FMA staff can view weekly operations.
13. In the event the ministry becomes aware of new information in the future that indicates potential adverse impacts to Aboriginal or Treaty Rights, Sakâw and/or its shareholders may be required to revise operating plans accordingly.
14. In accordance with Section 58(2) of The Forest Resources Management Act, Sakâw and/or its shareholders, employees and contractors are approved to access any closed roads located within the FMA area for the purpose of conducting approved forest management activities. Once forest management activities are completed roads shall be closed in accordance with the approved Forest Operations Standard of the day.

15. For all active company roads Sakâw and/or its shareholders are approved to control vegetation on the right of way as per the Forest Operations Standard effective May 15, 2019. For all non-company roads or inactive company roads separate approval is required to damage or destroy vegetation in the ROW of such access.
16. Unless otherwise specified in this approval or an amendment, all class 3 roads used for harvest under authority of this operating plan are to be reclaimed along with the in-block roads in the blocks they access including pre-existing class 3 roads which must be reclaimed to the same status as prior to harvest.
17. Any new or reopened access in regenerated areas must have that access reclaimed and silviculturally treated with the blocks they are accessing.
18. Seed mixes used for the purpose of stabilizing soils associated with stream crossing reclamation shall comply with the approved 2020-2021 aquatic habitat protection permit. Seed mixes shall not be used for other purposes without prior authorization from the Area Forester.
19. Upon approval of the plan all stakeholder engagement and commitments are conditions of this plan. Following approval all stakeholder engagement and commitments must be submitted to the Area Forester in a monthly report including nil reports for months with no changes, and will be deemed conditions of this plan. If there are alterations to these commitments evidence of alternative measures agreed to by the stakeholder prior to harvesting must be made available to the Area forester upon request
20. **“Utilization standards”** - as approved in the 2018 Forest Management Plan. This will supersede utilization standards identified within the Amended and Restated Prince Albert Forest Management Agreement Schedule H unless specific pieces of schedule H are not addressed in the FMP then those portions of schedule H apply.
21. For the purpose of mistletoe control in identified mistletoe control blocks, the Forest Operations Standard green tree retention requirements are waived. Shareholders should attempt to achieve green tree retention targets with species not susceptible to dwarf mistletoe. Sakâw is also approved to sanitize mistletoe pine adjacent to the approved block as long as the patch does not exceed 5% of the block size or 2 ha whichever is less. Maps of treated areas must be sent to the Area Forester ASAP.

22. For the purpose of mistletoe control in identified mistletoe control blocks, the Forest Operations Standard retention requirements area waived for RMAs. Shareholders should attempt to achieve green tree retention targets with species not susceptible to dwarf mistletoe. As well, the 10 m no travel zone is amended to a 5 m no travel zone.
23. Sakâw shareholders harvesting pulpwood under the 2020/2021 approval must have authorization from Paper Excellence to take the pulpwood and track it against Paper Excellence's TSL volume. Otherwise, Sakâw must identify to which shareholder the volume will be assigned upon completion of the harvest block. If there is no longer a pulp allocation (licence) then authorization is not required.
24. Sakâw and/or its shareholders are exempt from standards 1, 2, 3 & 5 of the Planning of Visually Sensitive Lakes section in the PA FMA VSA Standards as long as visual quality objectives are declared for blocks on visually sensitive lakes unless visual quality objectives are in an approved land use, forest management or operating plan as per the Forest Operations Standard.
25. All shareholders of Sakâw will operate in compliance with the Harvest Block Boundaries section of the Forest Operations Standard, effective May 15, 2019.
 - i. For ribboned boundaries, portions of the Forest Operations Standard Harvest Block Boundaries still apply including deviation requirements.
 - ii. Ribbonless boundaries are operational and all mapped boundaries are to be maintained with no deviation tolerance and other portions of Harvest Block Boundaries section of the Forest Operations Standard are to be met.
 - iii. Dunkley is approved for ribbonless boundaries subject to the following:
 - RMA boundaries, cultural/heritage sites, ecological sites and wildlife sensitive sites (e.g. mineral licks/bear dens, rookeries) must still be flagged.
 - Road and crossing locations on permanent streams and rivers must be flagged for any Class 1 and 2 roads.
 - Crossing locations on permanent streams and rivers must be flagged for any Class 3 roads.
 - Blocks must be approved on a case by case basis per contractor. Only 2 blocks per contractor will be approved at a time. Approval beyond the 2 blocks per contractor will not be provided until depletions of previous blocks are submitted. In other words, this can be a 2 block rolling approval.

- Prior to commencement of harvest of boundaries and non-ribboned road segments notification must be given to the Forest Service. The notification must include the block number and the contractor name.
- A map of the actual depletion showing all buncher tracks overlain with the approved block boundary is to be submitted to the Area Forester as soon as possible after the completion of the operations in the blocks.
- The GPS device is not to be turned off at any point when the machine is moving. Buncher tracks are to be provided for all buncher movements. If a GPS is needed for other activities the one from the buncher must not be removed.

26. All blocks adjacent to Highway 924 (Dore Road) require a 100 m buffer unless evidence of alternative measures agreed to by stakeholders is provided to the Area Forester prior to harvesting.

Area Specific Operating Conditions

The following section pertains to area specific operating conditions and Table 1 identifies all blocks approved as submitted while Table 2 identifies blocks with conditions. All area specific conditions must be adhered to.

Table 2. SAKAW 2018-2019 Blocks with Conditions

Unit #	Area Name & #	Block #	Condition
Unit # 1	Island Lake # 0102	Class 3 access into 019 & 022	The access through 2015 harvest block 020 must be reclaimed upon completion of 5 years of harvest starting in 2017-2018 along with the final blocks harvested in year 5 unless otherwise approved.
Unit # 2	Km 12 Snowfield # 0202	All blocks	Reclaim class 3 road back to Snowfield Road. Road user agreement required before harvest starts.
	Snowfield Junction East # 0204	Blocks 217, 218 & 219	These blocks are in Tier 1 caribou habitat. Need an approved mitigation plan prior to harvest approval.
	Snowcastle # 0205	All Blocks	Reclaim class 3 road back to Snowfield Road. Have road user agreement in place prior to operations commencement.
	Rabbit Lake # 0277	Class 3 Access	Class 3 access through past harvest block 010 to be reclaimed with in-block roads in block 009.
02_77_175 02_77_214		In original submission, blocks were shown as year 2 harvest blocks. Requires amendment to operating plan to move to year 1 for harvest approval.	
Unit # 5	Link Area North # 0504	Loop road	Loop road through block 05_04_008 and 05_22_009; gate or berm to be kept in place until all reclaim on these blocks is completed.
	Catch 22 # 0522	Loop road	Loop road through block 05_04_008 and 05_22_009; gate or berm to be kept in place until all reclaim on these blocks is completed. Block 05_22_009 is Tier 1 caribou habitat, no harvest until an approved mitigation plan is in place and amendment approved for harvest activity.
	Jack Rabbit # 0526	All blocks	These blocks are in Tier 1 caribou habitat. Need an approved mitigation plan prior to harvest approval.
	Torch River South # 0527	All blocks	These blocks are in Tier 1 caribou habitat. Need an approved mitigation plan prior to harvest approval.
	Torch River North # 0528	All blocks	These blocks are in Tier 1 caribou habitat. Need an approved mitigation plan prior to harvest approval.

Unit #	Area Name & #	Block #	Condition
Unit # 6	Evenden # 0602	Mile 18 Road	Once upgraded, a closure is to be installed on the Mile 18 road at a location where road upgrade will occur and must be installed while area is not active. Look at berm installation at start of KarHay IBR to close off road.
	Evenden West # 0605	Evenden West IBR	Once the area is complete the Evenden West IBR is to be reclaimed with the roads in final harvest blocks.
	Jailbird # 0613	All Blocks	Block design approved but stakeholder engagement with outfitter to be provided for Forest Service review prior to harvest approval.
	Evenden South # 0652	Roads Block 004	Once the area is complete, reclaim all roads as event appears complete. Block 004 isolates hardwood area.
	Rabbit Bush # 0654	Block 011	Block is in Tier 1 caribou habitat. Need an approved mitigation plan prior to harvest approval.
Unit # 7	Leadley Lake # 0705	Block 07_05_382	Block started in 2018, past two-year timeframe. Renumber for current harvest plans as per Forest Operating Plan Standard 1-3(2) and submit amendment.
	Camp Ten # 0720		Coordinate operations with Dog Sled race. Inform Parks Canada before harvest of blocks bordering National Park.
Unit # 11	Wabeno Lake # 1110	Wabeno IBR	The southbound portion of the Wabeno IBR in block 11_10_003 (2016) beyond where the class 3 access goes to Operating Area 1112 must be reclaimed to the status as prior to harvest upon completion of harvest of blocks south of that point. Maintain quad access for National Park.
Unit # 16	Two Forks West # 1604	Block 16_04_012	Block started in 2018, past two-year timeframe. Renumber for current harvest plans as per Forest Operating Plan Standard 1-3(2) and submit amendment.
	Caldwell # 1605		Remove T-Bone IBR once logging complete.

Unit #	Area Name & #	Block #	Condition
Unit # 18	Pisew Lake 165-02 # 1811	18_11_003	Winer access through swamp on west side not allowed. Use only one access into the block.
Unit # 21	Top Lake # 2102	Access road	Road through 21_02_209 to 21_02_200 to be reclaimed to quad trail status.
Unit # 22	Madison South # 2206		Is this the end of an event, if so pull out all roads into the area.
	Otter Creek # 2223		Road through block 22_23_007 down to Otter IBR to be winter access only. Install gate at McRobb IBR when not using road.
	Deer Lake # 2226		Is this the end of an event, if so pull out all roads into the area.
Unit # 23	Lost Lake #2334	Block 23_34_001	Block shows as started in 2018, past two-year timeframe. Renumber for current harvest plans as per Forest Operating Plan Standard 1-3(2) and submit amendment.
	Roberts Lake # 2304	Class 3 Road to 083	As the access through 2010 block 23_02_065 appears that it will be open for future harvest for a number of years, a closure is required where the road leaves the Roberts Lake IBR if the IBR is not closed. The class 3 access must be reclaimed upon completion of a 10 year window starting in 2017-2018 along with the final blocks harvested in year 10 of the event unless otherwise approved.
	Norton Lake # 2304	IBR	Where is the closure on the IBR – it is to show on the map submissions.
	Green Tree # 2393	Class 3 Road to 003 & 004	As the access through 2010 block 23_02_065 appears that it will be open for future harvest for a number of years, a closure is required where the road leaves the Roberts Lake IBR if the IBR is not closed. The class 3 access must be reclaimed upon completion of a 10 year window starting in 2017-2018 along with the final blocks harvested in year 10 of the event unless otherwise approved.

Unit #	Area Name & #	Block #	Condition
Unit 25	Swan Lakes # 2517	25_17_019	Block started in 2017, past two-year timeframe. Renumber for current harvest plans as per Forest Operating Plan Standard 1-3(2) and submit amendment.
		25_17_066, 25_17_071	Blocks are in Tier 1 caribou habitat. Need an approved mitigation plan prior to harvest approval.
Unit # 27	Sulby # 2708	Moose Meadow IBR	Moose Meadow IBR to be reclaimed upon completion within the area and the gate on the road is to be kept closed in the interim when operations are not active in the area.
Unit # 28	Spruce Point # 2804	Class 3 access	Class 3 roads are approved to deviate from planned locations by up to 200 m where roads are not already in existence. Existing roads must not be altered without prior approval.
	Rainbow Lake # 2809	Class 3 access	Class 3 roads are approved to deviate from planned locations by up to 200 m where roads are not already in existence. Existing roads must not be altered without prior approval.

Table 3. SAKAW 2020-2021 Blocks Not Approved

The following blocks are in Tier 1 caribou habitat and will not be approved until after a caribou mitigation plan is submitted by Sakâw and approved by the Ministry of Environment.
